Lagos, Nigeria

SUMMARY

Frontend developer and product builder based in **Lagos, Nigeria**. I specialize in turning ideas into real, shippable products — from TikTok-style consumer apps to blockchain infrastructure. I care deeply about **clean code, fast interfaces, and experiences that feel good to use**. Currently building at Lilyshop while completing my B.Sc. Computer Science at Lagos State University (Expected 2026).

EXPERIENCE

Frontend Developer

CURRENT

Apr 2025 — Present

Makarios Tech · Remote

- Built and shipped product interfaces from design to deployment using React.js and Tailwind CSS
- Collaborated with product and backend teams in a remote-first workflow, meeting sprint deadlines consistently
- Implemented responsive, accessible UI components following modern web standards
- Integrated RESTful APIs to connect frontend views with live data and dynamic content

Frontend Developer

CURRENT

Jul 2025 — Present

Lilyshop · Remote

- Led frontend development on Lilyshop, a TikTok-style vertical-scroll food ordering app with in-feed ordering
- Designed and built the full in-feed product discovery UI, delivering a swipe-native consumer experience
- Optimised component render performance for smooth scroll interactions on mobile-first consumers
- Worked cross-functionally to translate product vision into shipped, user-facing features

Frontend Developer

Prior

Inspirem Media Network

- Developed and maintained web interfaces for a media network, ensuring consistent visual standards
- Built reusable component libraries that reduced development time across multiple internal properties
- Translated brand and design guidelines into pixel-accurate, responsive frontend implementations

SKILLS

FRONTEND

React.js,
JavaScript
(ES6+), HTML5,
CSS3, Tailwind
CSS, Bootstrap,
Styled-
Components
