PROFESSIONAL SUMMARY

Frontend Developer and Product Builder with 2+ years of experience shipping real consumer products at startups. Specialise in React.js, Tailwind CSS, and API-driven interfaces — from TikTok-style e-commerce UIs to Layer-1 blockchain implementations. Known for translating product requirements into clean, performant, and accessible frontend experiences. Comfortable in fast-moving remote teams with a strong ownership mindset.

TECHNICAL SKILLS

FRONTEND

React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Styled-Components

APIs & BACKEND

REST API Integration, Supabase, Firebase, Node.js (basic)

TOOLS & DESIGN

Git, GitHub, Figma, UI/UX Design, Responsive Design, Vercel, Netlify

WORK EXPERIENCE

Apr 2025 – Present

CURRENT

Frontend Developer

Makarios Tech · Remote

- Developed and shipped product interfaces using React.js and Tailwind CSS, contributing to multiple feature releases within sprint cycles
- Integrated RESTful APIs to connect frontend views with live data, reducing data-fetching complexity through structured request handling
- Built reusable, accessible UI components across the product, improving development consistency and reducing rework
- Collaborated asynchronously with product managers and backend engineers in a fully remote team environment

Jul 2025 – Present

CURRENT

Frontend Developer

Lilyshop · Remote

- Led frontend development of Lilyshop, a TikTok-style food ordering platform enabling in-feed discovery and purchase without leaving the scroll
- Designed and implemented the vertical-feed UI from scratch, delivering a fluid swipe experience optimised for mobile-first consumers
- Optimised component rendering to sustain smooth scroll performance under real-world mobile conditions
- Worked cross-functionally with product leadership to translate early-stage vision into shippable, user-facing features

Prior

Frontend Developer

Inspirem Media Network

- Built and maintained web interfaces for a media network, ensuring visual consistency and cross-browser compatibility
- Created a shared component library that standardised UI patterns and reduced duplication across internal properties
- Translated brand guidelines into responsive, pixel-accurate frontend implementations

KEY PROJECTS

Lilyshop TikTok-style food ordering app — vertical in-feed discovery and purchase flow built from the ground up for mobile-first consumers. React.js · Tailwind CSS · REST API	SabiPass AI-powered exam prep platform for Nigerian students (JAMB, WAEC, Post-UTME) with an intelligent study assistant and freemium model. React · AI Integration · Supabase
Photographer Booking Platform End-to-end booking product from full UX design through backend API integration for photographer listing and session management. React · UX Design · REST API	Zunto Global marketplace — led product design and frontend architecture for a cross-border commerce solution built for scale. React · Product Design · Architecture
Balcoin Custom Layer-1 Proof-of-Work blockchain built from first principles — consensus mechanism, transaction validation, and chain state. JavaScript · Blockchain · PoW	\$BINGO Solana memecoin with a Telegram Web App integration — enabling in-chat token interaction and community engagement at launch. Solana · Telegram TWA · Web3

EDUCATION

2021 – 2026
(Expected)

B.Sc. Computer Science
Lagos State University (LASU), Epe Campus · Lagos, Nigeria
